**SEPTEMBER HEALTH EDUCATION & WELLNESS PROGRAM—POISONOUS BITES, PLANTS AND STINGS, REVISED:** Florida's wildlife, sea creatures and vegetation can be both beautiful and dangerous. The best way to protect yourself and your family is knowledge. Be aware of the hazards, how to avoid them when possible and learn what to do if you are bitten, stung or contact or ingest a poisonous plant. September's packet will include information on animals, reptiles, insects, marine life and plants that can harm you, tips on prevention and first aid if you do become a victim. Packets will be available at all medical facilities and upon request to Carol Roth, 867-3414, email **Roth-1, Carol** and on the Occupational Medicine web-site: <http://sgs/sgs/sites/other/chs/occmed/index1.htm>. (TA-C2)

**NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS:** How Do I Spot a Fad Diet? While there is no set approach to identifying a fad diet, many have one or more of the following characteristics:

- Recommendations that promise a quick fix
- Dire warnings of dangers from a single product or regimen
- Claims that sound too good to be true
- Simplistic conclusions drawn from a complex study
- Recommendations based on a single study
- Dramatic statements that are refuted by reputable scientific organizations
- Lists of "good" and "bad" foods
- Recommendations made to help sell a product
- Recommendations based on studies published without review by other researchers
- Recommendations from studies that ignore differences among individuals or groups
- Eliminate one or more of the five food groups.

Devoting yourself to a lifestyle that includes regular exercise and eating a proper diet with moderate portions is still the best method to lose weight and to keep it off. Most people who make the change from a typical high-fat diet and sedentary lifestyle to one that follows a diet based on the recommended food pyramid will slowly and safely lose weight.

**TURTLE NESTING SEASON IS HERE!** The months of May thru October are the prime months for sea turtles to nest along our beaches. KSC and CCAFS have some of the only remaining pristine beaches along the East Coast of Florida. Sea turtles use these beaches in high numbers for nesting. All exterior lighting at KSC and CCAFS, not just that which directly hits the beaches, can be a distraction to these turtles causing disorientation and nest abandonment. Please, take extra measures to ensure all non-essential exterior lighting is turned off. The KSC Exterior Lighting Guidelines can be reviewed on the Environmental Program Branch website at **<http://environmental.ksc.nasa.gov/natural/lighting.htm>**. If you see any lights that you feel need to be turned off or have any questions, please contact John Shaffer, NASA EPB, at 867-8448. (TA-C3)
